

Converting Casual Cyclistic Riders to Annual Members

Cyclistic Bike-Share
By: Srabanti Kundu

The Problem Statement:

Convert **casual riders** to annual members.

Solution:

Data driven marketing strategy to convert casual riders into annual members.

Data Analytics goals

1. HOW annual riders and casual riders use Cyclistic bikes differently.
 2. TOP 3 recommendations based on the analysis.
- 

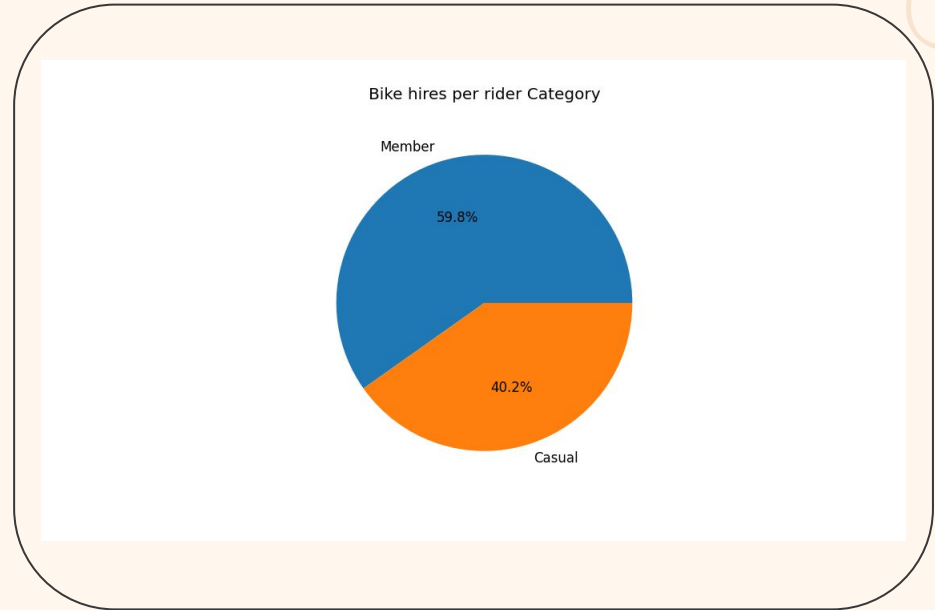

People love to cycle in summers

Our user base loves to cycle on weekends

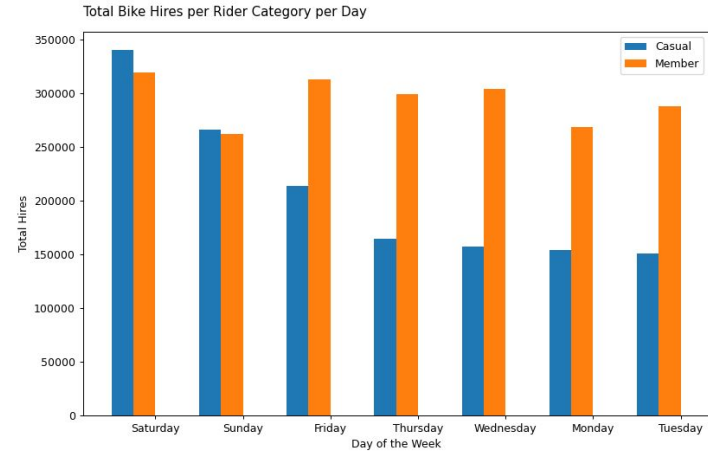

**But, we have more casual riders upto
----- %**

Members continue using their bikes in winters

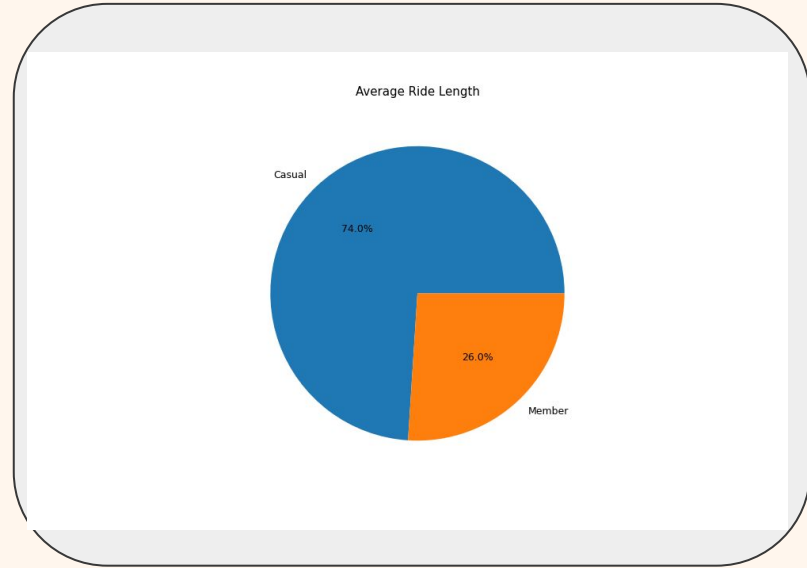

Members ride more consistently over the day of week than Casuals

Casuals ride longer and further

On average **casual** riders spend **47.6%** more time on their bikes than **member** riders.

Source: Average length per rider category (casual = 43 minutes, member = 15 minutes)

Average Ride Length per Month

Casual riders consistently outdo member riders throughout the year.

Average Ride Length per Day

Casual riders consistently outdo member riders throughout the week.

Recommendations

- Educate the casual riders about the potential **money** saving by purchasing annual memberships as they ride longer
- Run weekend marketing campaigns targeting casual riders on digital platforms.
- Run marketing campaigns targeting casual riders during summer months
